- **IDE:** Android Studio, Eclipse, Visual Studio Code, Visual Studio
- **Design Pattern:** MVC
- **Version Manager:** Github, Bit Bucket
- **Database:** MYSQL, SQLLite
- **Libraries and framework:** Node JS, React JS
- **Microsoft Office Suite** : Word, Excel, Powerpoint, Outlook

Projects

To-Do Application [Node JS, React JS, Bootstrap]
- Created an to-do list web application using node JS for back-end part it contains the logical part of inserting, deleting, editing and updating the data in list of application.

- The front-end part is done using react where the user can enter the data to that application and make a list of his related work to be done. For styling the front-end part I have used the bootstrap.

Social-Media Application[Java, Servlet, HTML, CSS, SQLLite]
- Create a social media application have done task related to database in Back-End which handles the user activities like adding a post, user login details, deleting a post. It is done in a team of two members. We have divided the work ourselves and finished the work in time.
- The HTML and CSS are used for front-end part which is visible to the user and also implemented the interface.

Covid-19 Tracker Application [Android, Java, REST API , Volley Library]
- It is made for keep tracking the people who are affected with corona virus throughout the world by selecting the country and city than is display the people who are affected and who are dead due to the virus.
- It is devised as user friendly where user can easily find the details.

Other Experience

Line Cook   Since 2019
    Diablos BBQ Cantina Tex Mex Smokehouse
- Make orders, prepare recipes and fries, keep the area clean.
